

Homeowner Inspection Checklist

Homeowners can use this checklist as a guide to make sure you are looking at all parts of the house. Check off the items that are in good condition, make additional notes about other issues found or possible issues that may occur in near future.

Although this list typically describes an ideal house; and this list should no way be misconstrued as a valid binding checklist for all homes but merely intended to be used only as a guide.

Notation: This checklist should not be relied upon as a home inspection report, nor should it be considered a substitute for a home inspection. Contact a qualified, educated, licensed, experienced ASHI certified home inspector in your area.

Grounds

- Proper grading drainage away from house
- No evidence of standing water
- No leaks from septic tank or leech field
- Yard, landscaping, trees and walkways in good condition
- No branches or bushes touching house or overhanging the roof
- Exterior structures (fences, sheds, decks, retaining walls, detached garages) in good condition, no evidence of termite damage or rotted wood
- Railings on stairs and decks are adequate and secure
- Driveways, sidewalks, patios, entrance landings in good condition, and pitched away from structure
- Downspout drainage directed away from structure and firmly fastened in place

Structure

- Ridge and fascia board lines appear straight and level firmly fastened in place
- Sides of house appear straight, not bowed or sagging
- Window and doorframes appear square (especially bowed windows)
- Visible foundation in good condition - appears straight, plumb, with no significant cracks

Exterior Surfaces

- Adequate clearance between ground and wood siding materials (6" minimum); no wood or manmade materials to earth contact due to moisture and drying out issues.
- Siding: no cracking, bubbling, curling, loose, dry-rot, caulking or sealant needed on open joints, seams or overlaps.
- Masonry veneers: no cracks in joints, no broken, spalling or flaking components
- Stucco: no large cracks (discuss all stucco cracks with a professional inspector)
- Vinyl or aluminum siding: no dents, damage, no bowing or loose siding

- ___ No vines on surface of structure
- ___ Exterior paint or stain: no flaking or blisters
- ___ No stains on exterior surfaces

Windows, Doors and Wood Trim

- ___ Wood frames and trim pieces are secure, no cracks, rot or decay
- ___ Joints around frames are caulked
- ___ No broken glass (window or storm panes) or damaged screens, no broken double paned, insulated window seals.
- ___ wood window frame and dividing grid and mullion glazing compound in good condition
- ___ Storm windows or thermal glass used
- ___ Drip caps installed over wind ***Windows,***

Roof

- ___ Composition shingles: no curling, no cupping, no loss of granulation particulate, no broken, damaged or missing shingles, no more than two layers of roofing
- ___ Wood shingles or shakes: no mold, rot or decay, no cracked/broken/missing shingles, no curling
- ___ Flat roofs: no obvious patches, no cracks or splits, minimal blisters/"alligatoring" and wrinkles, no silt deposits (indicates improper drainage), sealed tar at flashings
- ___ Flashing around roof penetrations
- ___ No evidence of excess roofing cement/tar/caulk
- ___ Soffits and fascia: no decay, no stains
- ___ Exterior venting for eave areas: vents are clean and not painted over
- ___ Gutters: no decay or rust, joints sealed, attached securely to structure, no bending or sagging, no sections of gutter or downspout missing, gutters clean, no mud deposits
- ___ Chimneys: straight, properly flashed, no evidence of damaged bricks or cracked joints, mortar/cement cap in good condition

Attic

- ___ No stains on underside of roofing, especially around roof penetrations
- ___ No evidence of decay or damage to structure
- ___ Sufficient insulation and properly installed insulation (moisture barrier installed closest to the heated area of the house)
- ___ Adequate ventilation, clear path into attic for air entering through soffit vents, adequately sized gable end louvers, all mechanical ventilation operational
- ___ No plumbing, exhaust or appliance vents terminating in attic
- ___ No open electrical splices

Interior Rooms

- ___ Floors, walls and ceilings appear straight and plumb and level
- ___ No water stains on floors, walls or ceilings no mold or mildew
- ___ Flooring materials in good condition
- ___ No significant cracks, holes in walls or ceilings
- ___ Windows and exterior doors operate easily and latch properly, no broken glass, no sashes painted shut, no decay; windows and doors have weather-stripping, "weep holes" installed
- ___ Interior doors operate easily and latch properly, no damage or decay, no broken hardware
- ___ Paint, wall covering, and paneling in good condition
- ___ Wood trim installed well and in good condition
- ___ Lights and switches operate properly
- ___ Adequate number of three pronged electrical outlets in each room
- ___ Electrical outlets test properly (spot check)
- ___ Heating/cooling source in each habitable room
- ___ Evidence of adequate insulation in walls
- ___ Fireplace: no cracking or damaged masonry, no evidence of back-drafting (staining on fireplace façade), damper operates properly, flue has been cleaned, flue is lined

Kitchen

- ___ Working exhaust fan that is vented to the exterior of the building
- ___ Ground Fault Circuit Interrupter ("GFCI") protection for electrical outlets within 6 feet of the sink(s)
- ___ Dishwasher: drain hose installed properly, no leaks, baskets, door spring operates properly
- ___ No leaks in pipes under sinks
- ___ Floor in cabinet under sink solid, no stains or decay
- ___ Water flow in sink adequate
- ___ No excessive rust or deterioration on garbage disposal or waste pipes
- ___ Built- in appliances operate properly
- ___ Cabinets in good condition: doors and drawers operate properly

Bathrooms

- ___ Working exhaust fan that doesn't terminate in the attic space
- ___ Adequate flow and pressure at all fixtures
- ___ Sink, tub and shower drain properly
- ___ Plumbing and cabinet floor under sink in good condition
- ___ If sink is metal, it shows no signs of rust, overflow drain doesn't leak
- ___ Toilet and tank operates properly

- ___ Toilet condition stable, no rocking, no stains around base
- ___ Caulking in good condition inside and outside of the tub and shower area
- ___ Tub or shower tiles secure, wall surface solid
- ___ No stains or evidence of past leaking around base of bath or shower or mold or mildew

Miscellaneous

- ___ Smoke and carbon monoxide detectors where required by local ordinances
- ___ Stairway treads and riser's are solid
- ___ Stair handrails where needed and in good condition
- ___ Automatic garage door opener operates properly, stops properly for obstacles
- ___ Garage attached partition firewall rated including firewall 30 in. door

Basement or Mechanical Room

- ___ No evidence of moisture, mold dry-rot, split cracked floor joist or beams
- ___ Exposed foundation; no stains no major cracks, no flaking, no efflorescence
- ___ Visible structural wood: no sagging, no damage, no decay, no stains, no damage from insects, sills attached to foundation with anchor bolts
- ___ Insulation at rim/band joists

Crawl Space

- ___ Adequate foundation vents
- ___ Insulation on exposed water supply, waste and vent pipes
- ___ Insulation between crawl space and heated areas, installed with vapor barrier towards heated area
- ___ No evidence of insect damage
- ___ No evidence of moisture damage

Plumbing

- ___ Visible pipes: no damage, no evidence of leaks, no signs of stains on materials near pipes; drain pipes slope slightly down towards outlet to septic/sewage system
- ___ Water heater: no signs of rust, vented properly, sized to produce adequate quantities of hot water for the number of bedrooms in the house.
- ___ Water pump: does not short cycle
- ___ Galvanized pipes do not restrict water flow
- ___ Well water test is acceptable
- ___ Hot water temperature between 118 - 125 degrees Fahrenheit, earthquake strapped in place, pressure relief valve drain line down several inches above floor

Electrical

- ___ Visible wiring: in good condition, no "knob-and-tube" wiring, no exposed splices, cables secured and protected

___ Service panel: adequate capacity, all cables attached to panel with cable connectors; fuses or breakers are not overheating

___ No aluminum cable for branch circuits

Heating/Cooling System

___ Appearance in operating well throughout (good air flow on forced hot air systems)

___ Flues: no open seams, slopes up to chimney connection

___ No rust around cooling unit

___ No combustion gas odor

___ Air filter(s) clean

___ Ductwork in good condition

___ No asbestos on heating pipes, water pipes or air ducts

___ Separate flues for gas/oil/propane and wood/coal

***** Notation:** When selling a home Homeowners should call a qualified Home Inspection Company out to perform a complete inspection of the home.

If an inspector performs a home inspection for the customer and notes a list of issues that must be fixed or repaired, each issue must be repaired and signed off by the licensed contractor performing the repairs, A copy of the inspection report with items repaired and signed off by license contractor must be given to the new purchasing homeowner.

Using a checklist like this before calling out a Home Inspection Company could save you hundreds of dollars

How may we further assist you?
